

MOPAR RACE INSPIRED

GRAPHIC INSTALLATION INSTRUCTIONS

Materials Needed for Application:

1. Application Squeegee (Included with kit)
2. Masking Tape
3. Tape Measure
4. X-acto knife or similar.
5. Soft Cotton Towel and Cleaning Solution

Important Note: Your graphics were produced using 3M Contoltac vinyl film with the unique Comply adhesive. This product allows virtually bubble free application and superior outdoor durability for fleet vehicle applications. Follow the step by step install instructions below:

1. Clean all surfaces thoroughly using appropriate cleaners and a soft cotton towel. Wax coats should be removed to insure proper adhesion of graphics.

2. Position graphics onto vehicle and align visually. Small pieces of masking tape work best for holding the graphic in place. Refer to placement illustration provided.

3. Apply masking tape horizontally across the top of the graphic to act as a hinge. This will maintain perfect alignment and allow installation by one person.

4. Flip the graphic up and slowly remove the release liner to expose the adhesive side of the applique. For best results, apply the graphics indoors and out of direct sunlight.

Temperature must be between 55 and 70 degrees F.

5. Flip graphic back onto vehicle surface. Burnish the graphic using the supplied application squeegee. Work from the top downward with even strokes.

6 Slowly remove premask covering to expose the graphic. Pull back at a 180 degree angle.

7. Burnish the graphic around the door handle, molding and other recesses. Using a heat gun can aid in this process, but be sure not to overheat the graphics.

8. Trim at all seams using a sharp x-acto knife. Take care not to cut into paint finish. Burnish material into recesses and door jambs as necessary.

9. Follow the same step by step instructions for installing the Mopar logos and Barb Wire graphics.

10. Once completed, the graphics installation is professional and will maintain its appearance for years. The 3M films feature a 3-5 year outdoor life durability.
